SUMMARY

Software Developer with 2.5+ years of experience building scalable backend systems, microservices, transactional applications, and cloud-native platforms across Amazon and PwC. Currently working in Amazon International Translation Services on Java Spring Boot microservices and REST APIs for multilingual enterprise applications and Tier-1 runtime string-delivery services. Experienced in building scalable transactional systems, participating in application design, troubleshooting production issues, optimizing Oracle SQL queries, validating APIs, and collaborating with global cross-functional teams. Proficient in Java, Spring Boot, Spring MVC, Hibernate, AWS, Docker, CI/CD, Linux, SQL, and Agile software development.

TECHNICAL SKILLS

Languages: Java, C#, .NET, TypeScript, JavaScript (ES6+), SQL

Backend & Frameworks: Spring Framework, Spring Boot, Spring MVC, Hibernate, ASP.NET Core, .NET 6, .NET 8, Entity Framework Core, Dapper, Azure Functions, REST API Development

Architecture: Microservices, Distributed Systems, Transactional Systems, Event-Driven Architecture, Software Architecture, System Design, HLD, LLD, API Gateway, Repository Pattern, Clean Architecture, Dependency Injection, Middleware, OOP

Cloud & DevOps: AWS, Microsoft Azure, Azure Service Bus, Azure Blob Storage, Azure Cognitive Search, Application Insights, Azure DevOps, Docker, Kubernetes, Helm, Linux, Prometheus, Grafana

Databases & Caching: Oracle SQL, SQL Server, Azure SQL, PostgreSQL, DynamoDB, Redis, Query Optimization, Indexing

CI/CD & Tools: Azure Pipelines, YAML, ARM Templates, Git, GitHub, Postman, BrowserStack

Integrations & Security: OAuth 2.0, JWT, SHA512, PayU, Twilio OTP, Firebase Cloud Messaging, WATI WhatsApp API, SAP Ariba, SAP ECC, Icertis CLM, Salesforce REST API, Microsoft Dynamics 365

AI & Modern Technologies: AI-assisted Development, Prompt Engineering, MCP Server

PROFESSIONAL EXPERIENCE

Software Developer - I - Amazon, Hyderabad, Telangana

Sep 2026 - Present

International Translation Services

- **Runtime delivery & scale:** Working in Amazon International Translation Services, owning runtime string-delivery solutions across Amazon. Developing and enhancing Java Spring Boot microservices for multilingual enterprise applications used by global teams, including three Tier-1 services - LMS, Transcord, and DPLS - delivering strings at **>1M TPS**, **p50 latency <10 ms**, and **>99.999% availability**.
- **API design, testing & production reliability:** Designing and maintaining scalable, reliable REST APIs; performing API testing and validation using Postman after feature releases and bug fixes; validating service functionality post-deployment; and improving service stability through monitoring, regression prevention, and production issue resolution using logs, SQL, and root cause analysis.
- **Cross-functional delivery & operations:** Collaborating with Engineering, QA, Product, and DevOps teams across architecture discussions, implementation, testing, and production deployments; leveraging AWS, Linux, CI/CD pipelines, and monitoring tools to maintain stable, high-availability production deployments.

Lead Software Engineer (Associate) - PwC India, Kolkata

May 2024 - Sep 2026

B2B and D2C FMCG E-Commerce Platforms | Pharmaceutical / CRO Client

- **Scalable commerce platforms:** Engineered features across **25+ ASP.NET Core/.NET microservices** and **110+ EF Core entities** using Azure SQL, Ocelot API Gateway, JWT/RBAC, clean architecture, React/TypeScript, and Azure services; supported **3,500+ retailers** and **approximately 8,000 orders/day** across **INR 14-16 Cr combined monthly GMV**, sustained **99.9% uptime** and **3x festive traffic**, cut feature-delivery time **about 30%** and **MTTR about 40%**, and reduced dispatch from **3-4 hours to under 5 minutes** while improving warehouse throughput **about 35%**.
- **Growth, performance and payments:** Built revenue and reliability features spanning referral/loyalty, search, payments, subscriptions, serviceability, notifications, and mobile delivery; drove **22% higher signups** and **INR 1.4 Cr+ incremental GMV**, reduced search p95 latency from **850 ms to 310 ms** and raised cache hit rate from **58% to 84%**, improved payment success from **91% to 97.5%** recovering about **INR 10 L/month**, scaled subscriptions to **about 12,000 users / INR 1.8 Cr+ monthly recurring GMV**, and cut undeliverable orders **about 75%**.
- **Enterprise integration and cloud delivery:** Architected event-driven enterprise integrations with .NET 8 Azure Functions, Service Bus, Dapper, SQL concurrency controls, SAP Ariba, Icertis CLM, SAP ECC, Salesforce, Azure DevOps, Docker, and observability tooling; automated workflows for a CRO managing about **INR 4,500 Cr annual procurement**, reduced contract turnaround from **about 7 days to under 2 hours** and duplicate posting **about 92%**, processed **500K+ records/day** at **99.9% accuracy** across a flow supporting **USD 120M+ annual revenue**, and cut failed-sync MTTR **about 60%**.

DevOps Engineer Intern - Bespoke Labs-AI, California (Remote)

Apr 2023 - May 2023

- Deployed a FastAPI and PostgreSQL microservice stack with Docker, Kubernetes (k3d), Helm, Prometheus, and Grafana, creating a reproducible production-grade local DevOps environment.

KEY ACHIEVEMENTS

- **Client recognition:** Received written recognition from the DGM Product at Satya Retail for revenue-impacting product features including referral, carousel, and floating-cart enhancements.
- **Enterprise-scale automation:** Automated a contract-lifecycle platform managing about INR 4,500 Cr in annual procurement spend, reducing turnaround from about 7 days to under 2 hours and posting errors about 92%.
- **Production incident leadership:** Led resolution of a production payment incident, improving payment success from 91% to 97.5% and recovering about INR 10 L/month through PayU integration and an idempotent order-to-payment state machine.

EDUCATION & CERTIFICATIONS

Jadavpur University - B.E. in Electrical Engineering (CGPA 8.33/10)

Jan 2020 - May 2024

Certifications: Microsoft Azure AZ-400 (DevOps Engineer Expert), AZ-204 (Developer Associate)
